worship for Sikhs.

The word "Gurdwara" means "Gateway to the Guru."

It is a sacred space where Guru Granth Sahib Ji, the holy scripture of Sikhism, is placed and respected.

Every Gurdwara welcomes people of all religions, castes, and backgrounds.

Inside the Gurdwara, people pray, sing shabads (hymns), and listen to Kirtan.

A Langar (free community kitchen) is served to everyone, symbolizing equality and service.

About Guru Granth Sahib Ji:

Guru Granth Sahib Ji is the eternal Guru of the Sikhs.

It contains the spiritual teachings of Sikh Gurus and saints from various backgrounds.

It is written in Gurmukhi script

Sikhs bow down before Guru Granth Sahib Ji with deep respect.

The teachings promote truth, love, equality, and devotion to God.

URU NANAK DE NEERIN **DLLEGE**

Day 2 – Induction Experience at GNDEC

The second day of my journey at Guru Nanak Dev Engineering College began with a fresh and vibrant start. It was a beautiful Monday morning, a day often associated with Lord Shiva, which made it feel even more special and peaceful.

The schedule kicked off at 9:30 AM with an English Proficiency Test in Room No. 106. It was my very first academic activity in college, and even though it was just a test, it marked the beginning of a new chapter filled with learning and self-growth.

Following that, from 10:30 AM to 11:30 AM, we had a Mathematics Proficiency Test. Both tests gave us a small but meaningful glimpse into the academic environment of the college and helped ease us into the routine.

After the tests, we were given a break from 11:30 AM to 1:00 PM, which we used to explore the beautiful campus. We visited key places like the sports complex and workshop areas, soaking in the atmosphere and enjoying the vibe of college life for the first time. It felt exciting to walk through the corridors where we'd be spending the next few years.

Post-lunch, at 1:00 PM, we attended a session by Mr. Aarshdeep Singh on the pivotal role of food in a student's life. It was both engaging and insightful, emphasizing how proper nutrition can boost energy, concentration, and overall well-being — things we often ignore during student life.

At 2:00 PM, we had an interactive session with the Cosmic Club, where they introduced us to the basics of GitHub and even guided us in creating our first GitHub account. It was thrilling to get hands-on experience with something that is such a key part of coding, tech projects, and future collaboration.

| By the end of the day, I felt a mix of joy, excitement, and curiosity . Day 2 was not just |
|---|
| about lectures and tests; it was about experiencing the essence of college life — from |
| learning and exploring to building new skills and creating memories. It was truly a fun and |
| thrilling experience that I'll always remember as part of my early college days. |

DAY - 3

GURUNANAK DEV ENGINEERING COLLEGE

My Third Day at Guru Nanak Dev Engineering College – A Memorable Beginning

As a B.Tech CSE student, my journey at Guru Nanak Dev Engineering College has just begun, and today marked the third day — a day that was as enriching as it was inspiring.

The first session of the day started at **9:00 AM** and was held in the college **auditorium**. We had the privilege to attend a lecture by **Dr**. **Jaswinder Singh**, who is not only a senior faculty member but also the **in-charge of IAPT**. His insights and experience set a motivating tone for the morning. The lecture provided a deep dive into the role of applied physics and technology in modern engineering, while also giving us a glimpse into the academic culture and opportunities within the institute.

Following this, from 11:00 AM to 1:00 PM, we were part of an expert lecture by Dr. Priya Darshni Ma'am on Universal Human Values. Her session was both thought-provoking and heartwarming. She emphasized the importance of empathy, ethics, and self-awareness

in our personal and professional lives — values that are just as crucial as technical skills in shaping a responsible engineer.

Today wasn't just about attending lectures — it was about exposure, inspiration, and the beginning of building a strong foundation for the years to come. I feel genuinely grateful to be part of such a reputed institution, and I look forward to more such meaningful experiences as the semester unfolds.

Thanks alot for this Induction may it help in our Future

GURUNANAK DEV ENGINEERINNG COLLEGE DAY 4

Day 5 College Experience – A New Chapter of Learning and Interaction

The fifth day at Guru Nanak Dev Engineering College began with a sense of routine slowly taking shape. Our first lecture kicked off at 10:30 AM in Room No. F108. It was a Basic Electrical Engineering (BEE) session delivered by Prof. Harminder Kaur, whose teaching style made even complex electrical concepts feel approachable. The class was engaging, and the clarity in her explanation helped us grasp the fundamentals with ease.

Right after that, from **11:30 AM to 12:30 PM**, we had our **Chemistry lecture**. The hour was filled with insightful discussions and practical examples that connected the subject to real-life applications, making the session both informative and thought-provoking.

Post lectures, we were given a **lunch break from 12:30 PM to 2:00 PM**. It was a much-needed breather, and we all spent time either in the canteen or under the shade of campus trees, sharing our early college experiences and bonding more with classmates.

The most interesting part of the day began at 2:00 PM, when we were asked to gather outside the TCC Seminar Hall. There, the college staff collected details for our ID cards. The atmosphere was lively, with long lines of students but also laughter, casual conversations, and new friendships forming. Though it was a bit tiring standing in the sun, the entire process felt like a step closer to officially becoming part of the college community.

Overall, **Day 5** was a perfect mix of academics and administrative interaction — a reminder that college life is not just about studies but also about connecting, growing, and becoming a part of something bigger.

GURU NANAK DEV ENGINEERING COLLEGE INDUCTION DAY-5

🏫 Induction Day 5 Experience – Guru Nanak Dev Engineering College

Date: Tuesday (Auspicious day of Lord Hanuman)

Time: 10:30 AM – 4:30 PM

The day began with a peaceful and silent **good morning**, as we all gathered for the fifth day of our induction program. Being a Tuesday, a day dedicated to Lord Hanuman, it felt spiritually positive — a perfect start to a new learning day.

Our first session began at 10:30 AM and continued till 11:30 AM. We had a Basic Electrical Engineering (BEE) lecture by Prof. Harminder Kaur from the ECE department. Her teaching style was clear and engaging, which made technical concepts easier to understand even for students from non-electrical backgrounds.

After a short break, our second lecture started at 11:30 AM and lasted till 12:30 PM. It was a Chemistry session by Prof. Mandeep Kaur from the Electrical Engineering (EE) department. The class was informative and connected scientific concepts with practical applications, which helped build interest.

We were then given a break from 12:30 PM to 2:00 PM to relax, have lunch, and recharge.

The final session of the day began at 2:00 PM and continued till 4:30 PM. It was all about ID information and verification. We were asked to assemble outside the seminar hall, where our details were collected and confirmed by the college staff and faculty members. It was a bit hectic but necessary.

By the end of the day, we were all tired as the **hot weather** made things challenging. Finally, we returned to our PGs with slightly drained energy but a sense of progress and excitement for the coming days.

👦 As a student...

This day gave me more confidence as I slowly started adjusting to the college routine. I felt more connected with my batchmates, and the sessions were slowly shaping our understanding of engineering life. Though the weather was hot and exhausting, the experience was worth it.

GURU NANAK DEV ENGINEERING COLLEGE, INDUCTION 2025

Day 6 – A Warm Wednesday at GNDEC

Day 6 of my induction at Guru Nanak Dev Engineering College began with a beautiful and warm Wednesday morning, the kind that makes you feel both relaxed and excited for the day ahead. The atmosphere was peaceful yet buzzing with the energy of learning.

Our day officially started at 9:30 AM with a Chemistry lecture by Mandeep Kaur Ma'am. Her way of teaching was clear and easy to grasp — it made me feel like this subject won't be as difficult as I had imagined. It was a great start to the morning.

Then at 10:30 AM, came my favourite subject: Mathematics, taught by Gaggan Deep Kaur Ma'am. I genuinely enjoyed her class — the way she explained concepts with calmness and clarity made math feel enjoyable and engaging.

After the lectures, we took a break, and like typical college students, a group of us headed straight to the canteen for some snacks. I had a samosa, and while it wasn't the tastiest one I've ever had (a little different from what we get in Himachal), it still added to the fun of living and eating in a new city like **Ludhiana**. The warmth here is quite different from back home, but I'm slowly adapting to it.

During the break, we also visited the college library, and honestly, it left me amazed. It was quiet, peaceful, and filled with books — a perfect place to study, reflect, or just spend time with knowledge. The calm environment gave me motivation to sit and read there often.

After lunch, from 12:30 PM to 2:00 PM, we had an inspiring session by Dr. Arvind Dhingra, the **Director of STP and Incharge of TAC**. His insights into the structure of training and placement in the college gave us a strong glimpse into how our future would be shaped through career development activities.

Following that, we had an extremely engaging session with Mr. Jasvir Singh Sekhon, the District Resource Person. The way he interacted with the students and the topics he

discussed made it one of the most **interesting sessions** of the day. He kept the class alive with real-life examples and motivational ideas.

To close the day on a refreshing note, **Dr. Lakhvir Singh Khanna** conducted a short but effective **stress-relief session using clapping exercises**. It may sound simple, but it truly helped in boosting energy and lifting our moods. It made the entire hall feel connected and light-hearted.

After the sessions ended, I walked back home with a **smile on my face**, feeling a little tired but extremely satisfied. I had a **hot cup of tea**, sat down, and reflected on how wonderful the day had been. Every moment — from learning in class to relaxing with friends — felt like a step forward in this exciting new chapter of life.
